

That's Nasty

He Is Legend

Try and wrap your head around it
How long have you been surrounded
Try and be alone and not lonely

This is a familiar story
So tired and so boring
You don't wanna know if it
Don't involve me

Now you do what you want to do whenever you want to
Baby that's nasty
And now you do what you want to do whenever you want to
You gotta leave me be

And now you're trying to create a scandal
But you gotta find a different handle
It's not that bad just wait and see
And boy you're missing out on everything
Every note you sing will burn your throat like warm whiskey
And you will not grow if you don't learn how to breathe

And now you do what you want to do whenever you want to
Baby that's nasty
And now you do what you want to do whenever you want to
You gotta leave me be

And are we all alone in here
Are we special or we real
Is this what makes you feel alive
And are we all alone in here
Are we special or just weird
Is this what makes you feel alive

No, I'm not feeling alive
Not feeling alive
No, I'm not feeling alive
I feel just fine
