

To Infinity and Beyond

He Is We

I was half alive, torn apart
There you were, you appeared and healed my heart
I could kiss you for eternity, hey
Feel your heart pressed hard against me, yeah

Loving you has been the best thing I could do
I'd do it all again
If it meant that I would be with you
To infinity and beyond and then some
Loving you has been the best thing I could do

Never thought that I'd have it all
Found the hands to pick me up when I fall
I'm bound to love you till I die and then
Make sure in heaven, do it all again

Loving you has been the best thing I could do
I'd do it all again
If it meant that I would be with you
To infinity and beyond and then some
Loving you has been the best thing I could do
I love you

Every broken heart
Every past mistake
You showed me love
Told me I was good enough [?]
All my walls came down
All of me poured out
And somehow we're standing proud
Look at us now
Look at us now

Loving you has been the best thing I could do
I'd do it all again
If it meant that I would be with you
To infinity and beyond and then some
Loving you has been the best thing I could do

Loving you has been the best thing I could do
I'd do it all again
If it meant that I would be with you
To infinity and beyond and then some
Loving you has been the best thing I could do
