

With You

He Is We

You love me when I can't love myself
I can't imagine walking this life with anyone else
You're more than enough for the both of us
And when things get rough I'm still so in love

With all we have
Through the good and the bad

Until death separates us two
I promise to give all I am to you
It's not much but I hope it's enough to get us through
To a chapter where happily ever after comes true
With you

I thank god for knowing I'm all yours
I haven't been perfect but no one could love you more
You're the best thing I've ever had
And I'm sorry for making you feel less than that

You've taught me I could be loved
And that I'm good enough

Until death separates us two
I promise to give all I am to you
It's not much but I hope it's enough to get us through
To a chapter where happily ever after comes true
With you

I don't want another first date, first kiss
I want all of you, enamored in complete bliss
All of this

Until death separates us two
I promise to give all I am to you
It's not much but I hope it's enough to get us through
To a chapter where happily ever after comes true
With you
With you
