

## Lullabies

## Headlights

Just a talk, it's all you wanted  
Tooth and nail is what you fought with  
All you've got is that photograph that makes me laugh  
This heart attack is killing me  
Cause every time I turn around it's something else

I've been learning for some time and presently it comes  
to mind  
That I'm not well  
Your heart attack is killing me  
Cause every time I turn around  
You're someone else

Lullabies never worked when I was young and they won't  
work now  
Close your eyes and you go to somewhere else  
Anywhere else, yeah, anywhere else

Lullabies never worked when I was young and they won't  
work now  
Close your eyes and you go to somewhere else  
Anywhere else, yeah, anywhere else
