

Your Old Street

Headlights

Down your old street
Kids are laughing like no one is meek
Was that what you thought you need
To be inspired again?
Like you once were
Like you once were

Like you once were
You've got to move until day

It's just another day
Make a break for it
Turn to all the clocks
On the wall
Smash 'em down
So you have to crawl
On your hands and knees
On your hands and knees

On your hands and knees
Just to tell time

Just look outside
There's a space between all of those cars
Drive through your mind
They're on their way to take care of
The important things
The important things

All those important things
That you've got to do
To get by

Down your old street
Kids are laughing like no one is meek
Was that what you thought you'd need
To be inspired again?
Like you once were
Like you once were

Like you once were
You've got to move
Until day
