

Over the Fields

Heather Nova

I heard you slipped into the light we cannot see
Behind the veil and the songs
Reaching out to those who came to you in dreams

Over the fields you go
Over the wreckage in slow motion
Everything that you used to know
All the weight, all the weight, you can let go

And you remember making angels in the snow
A flash of who you could have been
Begin the journey that you started long ago

Over the fields you go
Over the wreckage in slow motion
Everything that you used to know
All the weight, all the weight, you can let go

And all apologies and all the damage done
Somehow you never found the key
It's coming to you now as you head into the sun

Over the fields you go
Over the wreckage in slow motion
Over the fields you go
Over the wreckage in slow motion
Everything that you used to know
All the weight, all the weight, you can let go
All the weight, all the weight, you can let go
All the weight, all the weight
All the weight, all the weight
