

Look After Love

Heatwave

While stars fill my eyes, when you're by my side
And words weren't intended for feelings like this, only a kiss.
So don't ever feel; I'll always be there...
And we'll build our life, filled with moments of gold, and memories to hold

So let's look after love, and we'll be alright, hold on to all we've been sharing, caring.
Let's look after love, and we'll do just fine, keep all those good dreams alive, every night.

I don't have to try; I know I can smile
'Cause you give me magic that shines through my day, lightens my way.
And each time we touch, I fall more in love
'Cause we've found that something that time can't erase, together always... always together.

So, let's look after love, and we'll be alright, hold on to all we've been sharing, caring...
Let's look after love, and we'll do just fine. Keep all those good dreams alive...
So, let's look after love, and we'll be alright, hold on to all we've been sharing, caring...
Let's look after love, and we'll do just fine. Keep all those good dreams alive...

Look after love... and we'll be alright...hold on to all we've been sharing, caring
Look after love... keep all those good dreams alive
Keep the dreams alive, alive yeah...
Sharing, caring
Always caring for your love
With a tender smile...
So let's look after love
Look after love...
...it'll be time, yours and mine
Sharing, caring
...and you, you, you, make magic shine from my face, bringing moments of gold, memories to hold... always... always
Look after love
...it's gonna be so fine, just knowing,
Sharing, caring
...just have to say why I feel this way, each and every day, falling more, more, more in love...
