

Fly to Mars, travel half-way to the stars
Spend a light year going
Round and round the moon
My radar blip, your rocket ship
You're coming through

Clear blue skies, sunlight dazzling my eyes
Feeling dizzy, feeling giddy from the rays
Wave at the moon
Say you'll come soon
Take me away

I'm flying in the air
Floating I don't care
Anywhere with you
Imagine we're caught in outer space
Sunlight on your face
You can make it true

Gravity is dragging me down
Can't bear feeling I'm earthbound
Come in to land, take my hand
Four, three, two, countdown to one
Seconds blurring, world is gone
Just me and you, take me too

Pick a dream, maybe lying in moonbeams
Find abandoned rockets buried in space dust
Sub-lunar sea
Space manatee
Singing to us

I'm flying in the air
Floating I don't care
Anywhere with you
Imagine we're caught in outer space
Sunlight on your face
You can make it true

Gravity is dragging me down
Can't bear feeling I'm earthbound
Come in to land, take my hand
Four, three, two, countdown to one
Seconds blurring, world is gone
Just me and you, take me too

Four, three, two, countdown to one
Seconds blurring, world is gone
Just me and you, take me too
