

Enemies

(Hed) P.E.

We're on our own and few minutes left, we made it to the edge t
hrough arrests
You were the first one to cross the line, now all we have are t
he days of hate
We walk the streets, when the shadows crawl, you can't take us
under control
The enemies of the power, the enemies of the state

Now run for your life
They've come for your hide
You're all out of time
Answer for your crime now
So run for your life
Ask not for whom the bell tolls
Run into the night
Find out just what the end holds...

Every change has its season
You can come in
Or freeze in the cold
Every traitor and treason
Will dissolve in the light of it all

Crawl like roaches
Through cracks in the wall
Now the ice slowly melts in the hall
Exposing the bodies and lies of it all

Are we not a republic?

Now run for your life
They've come for your hide
You're all out of time
Answer for your crime now
So run for your life
Ask not for whom the bell tolls
Run into the night
Find out just what the end holds...
For you...
We're tired of waiting
Its not too much to ask
It won't be pretty
When we rewrite the past

Tear it down
