

Half The Man

(Hed) P.E.

Caught between the ones you love,
And the ones who would destroy you
Caught between the sunlight,
And the night that came before you
Caught between the madness and confusion of deception
You just close your eyes...

I can't help noticing the fear that's in your eyes...

Why do I feel this way
I can barely stand up straight
Just take a good look at me
Now I'm about half the man
Just half the man
Every dog has its day
I can barely stand the wait
Just take a good look at me
Now I'm about half the man
Just half the man
Caught between the streets you love,
And the other side of time
Caught between your new interest,
And the one you left behind
Caught between the madness and confusion of deception
You just close your eyes

I can't help noticing the fear that's in your eyes...

I've wasted so much time
I've wasted half my life
They tried to take away my life
They tried to take away my life
Caught between the Milky Way,
And the other side of time
Caught between your new best friend,
And the one you left behind
Caught between the madness and confusion of deception
You just close your eyes

I can't help noticing the fear that's in your eyes...

I've wasted so much time...
