

Make You Proud

Hedegaard

I woke up staring at the sun
You were there too and the world just felt like one
You gave me a smile and you told me what you knew
That as long as love's around I will never fear the blues
Since then I put my heart in everything I do for you

I still hear you now
Even though it's in the past
You showed me how
To make a precious moment last
I sing for you, I sing it loud
If you're there just let me know somehow
Cause at the end of the day
I do everything to make you proud

You taught me, taught me how to live
And without you wouldn't know how to forgive
Now I wanna be strong try to be there just like you
I wanna be the mirror that you're proud to look into
I wanna be the one who always follows through

Cause I still hear your words
Even though it's in the past
You showed the world
But it flew away so fast
I sing for you, I sing it loud
Now if you're there just let me know somehow
Cause at the end of the day
I do everything to make you proud x5
