

Not Alone

Heffron Drive

LAX to Charles The Gaulle
It's another airplane, another show
I can go days, no sleep at all
Cause living on edge and sleeping on my own, own, own
Is getting really old, old, old

The city skyline view from here
Is not the same thing without you near
Click your pretty heels and just appear
Ruby red lips and arms that I can hold, hold, hold
And never let you go, go, go

Everything I know,
Is everything you told me
You keep me afloat
When I'm miles away from home
In a crowded room with faces,
They don't know me
I can think of you and I know
I'm not alone
I know I'm not alone

Are you on the beach in California?
In a two-piece, sipping drinks
Or are you sitting back home in our favourite chair?
All I think about is sitting there with you, you, you
Is all that I can do, do, do

There's about a billion people
In the space between us
But you're the only one that I wanna be with
It's taking all of me that I can spare
It's breaking everything inside
I swear it's true, true, true
I only think of you, you, you

Everything I know,
Is everything you told me
You keep me afloat
When I'm miles away from home
In a crowded room with faces,
They don't know me
I can think of you and I know
I'm not alone
I know I'm not alone

I'm not alone, I'm not alone

I can't breathe without you,
I can't sleep without you by my side everynight,
I can't eat without you,
I can't dream without you by my side everynight.

Everything I know,
Is everything you told me
You keep me afloat
When I'm miles away from home

In a crowded room with faces,
They don't know me
I can think of you and I know
I'm not alone
I know I'm not alone

Everything I know,
Is everything you told me
You keep me afloat
When I'm miles away from home
In a crowded room with faces,
They don't know me
I can think of you and I know
I'm not alone
I know I'm not alone
