

Night On the World

Heimdall

Look up the horizon
The heavens blacken
The screams tear the silence
Watching above - the moon
No light here in this lonely land

I'm in the dusk
Watching the world fall
Still in the darkness

Burning down
The gods are crying for our fate
Burning down - night falls down
here on the world

The armies clash tonight
The bloody swords twirl without rest
Fragments in black and white
Silver tears rain down from the skies

I'm in the dusk
Watching the world fall
Still in the darkness

Burning down
The gods are crying for our fate
Burning down - night falls down
here on the world
