Savior

Heir Apparent

```
Man and machine
Sharing thoughts
- mind and reason
The storage of genius unfurled
To build a device
That will harness our vision
Our knowledge
Our future
Our world

They call it Savior

Intricate designing
And careful refining
Tp the future
Your mind will be hurled
With data and wires
Your dreams and desires
Your feelings exposed to the world

Memories extracting
Your thoughts everlasting
The hard drive is storing your mind
You save the nostalgic - the logic - chaotic
To benefit all mankind

They call it Savior
```
