

Friendly Strangers

Helalyn Flowers

Lock up the door
Missing shadows on the floor
As I look up to you
I fall into danger

Pale as my fave
I've been waiting here for days
Something's changing our fate
You're hiding a secret

If you only knew how to set me free
If you only knew what is (dependency)

Cause everytime we see each other
Crying for our blames and crimes
I feel like you were telling me
"We'll never die alone"
But sometimes
When you look at me it seems
Like we were playing like children
Going to abuse each other
If we only knew how to keep this distance
So far away...

It's getting late
You promised me to be friends
We're so close, now alone
But never too distant

I've never changed
Since we met under the rain
It seemed like you were telling me
"we'll never die alone"

If you only knew how to set me free
If you only knew what is (dependency)

Cause everytime we see each other
Crying for our blames and crimes
I feel like you were telling me
"We'll never die alone"
But sometimes
When you look at me it seems
Like we were playing like children
Going to abuse each other
If we only knew how to keep this distance
So far away...
