

Love Like Aliens

Helalyn Flowers

little girl without your desolation
across the eye you see
you lie

little boy you need a medication
she cuts you with your screams
and lie

I remember the day we were free to smile the world around
in many spaces you are
I remember the day we were free to change everything into a lie

remember today we were walking like aliens
on our dimension
down down down
remember today we were loving like aliens
and our creations
down down down
one by one

little girl your lost in your obsessions
collecting memories
down down

little boy your part of my narration
I cut you with your screams
and lies

remember the day we were free to put together black and white
feeling beautiful inside
remember the day we were free to lose everything back in time

Remember today we were walking like aliens
on our dimension
down down down
remember today we were loving like aliens
and our creations
down down down
one by one

loving like aliens (2x)

down down down (2x)

remember today we were walking like aliens
on our dimension
down down down
remember today we were loving like aliens
and our creations
down down down
one by one
