

Take What You Find

Helen Reddy

Lonely nights seem so long
I can't feel right all alone
Walk the streets to ease your mind
Lookin' for love, but you take what you find

Love is yours, then it's gone
One thing sure - life goes on
You're the one who's left behind
Lookin' for love, but you take what you find

Take it where you find it
And give it everything
Beggars can't be choosers
So when you can't find love
Take the next best thing

Take it where you find it
And give it everything
Beggars can't be choosers
So when you can't find love
Take the next best thing

Instant love keeps it light
Just enough to fill the night
High ideals left behind
Lookin' for love, but you take what you find

Take it where you find it
And give it everything
Beggars can't be choosers
So when you can't find love
Take the next best thing
