

Colour Your Dream

Helena Papparizou

The world needs a change
You must hear the page
Get away from black and white
The people are strange
Just do it your way
They will follow you to do the same

I dream in a blue sky
I follow the red light
And lead the way for a perfect world

All over creation
we' re building a nation
Surrounding with colours a perfect dream
All over creation
a new generation
Today is the day
To colour your dream

(Are you ready)

Colour your dream

Decide for your life
The future looks right
The music is loud and it starts tonight

I dream in a blue sky
I follow the red light
And lead the way for a perfect world

All over creation
we' re building a nation
Surrounding with colours a perfect dream
All over creation
a new generation
Today is the day
to colour your dream

(Are you ready)

Colour your dream
Colour your dream

All over creation
we' re building a nation
Surrounding with colours a perfect dream
All over creation
a new generation
Today is the day

To colour your dream
