

# Dynamite

hello

Nobody knew her name  
She turned up just the same  
There was a knock on the door  
A bump on the floor  
And the party turned insane  
She called out her na-a-a-a-me

Then she walked in looking like dynamite  
She said now come along boogaloo through the night  
And by the way she's moving well dynamite  
Might she not, we're all she's got

She's got the whole town lighting up dynamite  
Nobody quite knows what to do wrong or right  
But they all know Dyna is dynamite  
They're right

She hadn't been there long  
When she told us where she came from  
There was a flash in the sky  
A light in her eye  
And the dynamite light burned on  
As the music went on and on, and on  
And on, and on, and on, and on, and on

Then she walked in looking like dynamite  
She said now come along boogaloo through the night  
And by the way she's moving well dynamite  
Might she not, we're all she's got

She's got the whole town lighting up dynamite  
Nobody quite knows what to do wrong or right  
But they all know Dyna is dynamite  
They're right

And then she walked in looking like dynamite  
She said now come along boogaloo through the night  
And by the way she's moving well dynamite  
Might she not, we're all she's got

She's got the whole town lighting up dynamite  
Nobody quite knows what to do wrong or right  
But they all know Dyna is dynamite  
They're right

But they all know Dyna is dynamite.
