

# Midnight Strangers

hello

Where were you, were you smiling  
I couldn't see your face  
Your reflection is in the mirror  
And in an empty space

You seem to talk then you left, ah  
I didn't understand  
Looking at me made me quiver  
Wanting to hold your hand

You started talking to me then  
Look out kid she said  
You turn away into the night  
I knew our love's just

For midnight strangers, midnight strangers  
Midnight strangers, midnight strangers

I took a stare into the mirror  
Searching all the night  
And for your smile I bring roses  
And for your love I wait

You seem to talk then you left, ah  
I didn't understand  
Looking at me made me quiver  
Wanting to hold your hand

You started talking to me then  
Look out kid she said  
You turn away into the night  
I knew our love's just

For midnight strangers, midnight strangers  
Midnight strangers, midnight strangers

I need a chance to find new love  
And now I made it there  
And if true love walked right through me  
I knew our love's just

For midnight strangers

Strangers, midnight strangers  
Midnight strangers, midnight strangers  
Midnight strangers, midnight strangers ...
