

# S'only Natural

Hellogoodbye

It's only natural  
They're looking at you  
Like you must not be from here kid  
Better move on up

Night in the city  
Its getting in me electricity everywhere  
And I'm falling in love

They wanna hold you  
Pin and control you  
They won't control anything  
But they never give up

They want you quiet  
Not too excited by the natural energy  
Of falling in love  
With everyone and everything

Its only natural  
You wanna live downtown  
Where you can be a little louder  
And you're still just getting drowned out  
Its only natural

Its only natural  
You wanna live downtown  
Let your freak flag fly a little higher  
I like it when you let yourself lose control
