Stuck to You

Hellogoodbye

Holding my breath For a whole month If I held your breath At least we would touch

Keeping from you Keeps me from sleep It's just this bad beat That I just can keep

Oh girl, it's true I can never be away from you It's like you gloss your lips with glue Oh we kiss and I am stuck to you

My hearts on the floor My feet feel like lead I'd quit the tour But I'm already dead

Our only connection is synthetically We show our affection electronically

Oh girl, it's true I can never be away from you It's like you gloss your lips with glue Oh we kiss and I am stuck to you

We lock lips and throw the key out till it slips that I must leave town Our love reaches Across oceans To your beaches Lonely notions

Oh girl, it's true I can never be away from you It's like you gloss your lips with glue Oh we kiss and I am stuck to you
