

We Unite

Helloween

When tyranny will have an end around the world
And freedom has become a part of all our lives
When slavery will have an end to all of us
Then we don't mind the colour of our skin

We go straight for paradise
No more treason, no more lies

One day we will know
What we are fightin' for
Under the eternal sky we unite to be free from your spell
Someday we will know
What we are cryin' for
Under the eternal flame that's called freedom again we unite to
be free

Dictators and pretenders we don't need no more
No more sending death and soldiers round the world
When no one listens to you and just turns around
Then your worlds'll be blowing in the wind

We go straight for paradise
No more treason, no more lies

One day I will know
Under the eternal sky we unite to be free from your spell
Someday we will know
Under the eternal flame that's called freedom again we unite

When tyranny ended and slavery has brought to fall
Then freedom will show
That the world we do live in is worth to fight for

One day we will know
What we are fightin' for
Under the eternal sky we unite to be free from your spell
One day we will know
Under the eternal flame that's called freedom again we unite to
be free
