

Black Flag Army

Hellyeah

We've spent our lives left out in the rain
As you stand dry behind the window pane
Don't try to understand us you have no clue
So I took a bat and broke the glass
Your exclusive, but you have no class
Never been first, but we're built to last
We're not afraid of you
Born to make you uncomfortable
Our hate is unconditional
Coexistence is impossible
And we're coming for you!

We're the black flag army the militia of truth
Raise your black flag pledge allegiance to our roots
We're the black flag army, demolition crew
You just lean on me, and we'll lean back on you

You spent your life sheltered in the shade
We stood in the ruins as the fires blazed
You tried to dull our shine but we refused
So I took a knife and I made the cut
Million dollar smile, that you can't stitch up
You're the diamonds and we're the rust
Choke you with your silver spoon
We're caustic and we're flammable
We're feral mother fucking animals
Our fists are up, we're unstoppable
And we've got a gift for you

We're the black flag army the militia of truth
Raise your black flag pledge allegiance to our roots
We're the black flag army, demolition crew
You just lean on me, And I'll lean back on you
Raise your black flag! and terrorize!
Raise your black flag! no compromise!
Raise your back flag! we're under siege
Raise your back flag! and stand together with me

We're the black flag army the militia of truth
Raise your black flag pledge allegiance to our roots
We're the black flag army, demolition crew
You just lean on me, And I'll lean back on you
We're the black flag army the militia of truth
Raise your black flag pledge allegiance to our roots
We're the black flag army, demolition crew
You just lean on me, and I'll lean back on you
Raise your black flag! and terrorize!
Raise your black flag! no compromise!
Raise your back flag! we're under siege
Raise your back flag! and stand together with me
