She's Lost

Helmet

Can't explain, can't decide Can't confirm or deny We could talk all night

They say you hurt the ones you love You love yourself more than anyone Honey, do it right

True love waits
Or maybe only suffocates

I love the way you work a room
The way you talk, the way you move
You were never shy

So bored, you watch them feed They bite but don't bleed Honey, suck them dry

Love and hate Anyway you suffocate
