

Starbreeze

Hemina

Feel the glow it's here to stay
The earthly astral interplay
The Starbreeze
Oh, it must be fed
Time to face the music that's ahead

Starry night o' night so bright
Behold our pixeled cosmic sight
Past the solar wind lies a Starbreeze
The cooling flame, the lion's gaze
The golden bars on heaven's gates
Beyond the glow of Venus, a star is born

Is this the age they'd sung about
In hippy tales of galaxies?
Beneath the sugary sky lies a Starbreeze
Rainbow excites the child's eyes
The pastelled stellar dance tonight
Betwixt our moon and Venus, a star of beauty; me

Let this gust wash over me
I'm soaring through the air
Higher and higher and higher again
Higher and higher, please never end
Till I'm dead...

[Guitar Solo – D Skene]

Gather round and stay a while
It's time to face the music ahead!
