

Ac

Hendersin

Tell me how you make me weak but the love is so strong
If loving you ain't right then I wanna be wrong
Been together here forever, doesn't feel like that long
Who woulda thought we would take it we would make it this far?
I just wanna be every single place that you are
Takes me back to the days we used to sleep at your car

Remember it had no AC
We didn't care if they might see
And you chose to stay with me
Who knew that one day we'd be
Remember, it had no AC

Can't believe when I first met you that I was just so hammered
But I've always been enamored and I get why they all clamored
Like the kiss that we had, well you known to raise the standard
And you move a mile a minute but you never mind your manners

You're my emotional wildcard yet cool, calm, and collected
And your love is deep with the ones you keep but yet you stay protected
And you're by my side, love, no pride, when I'm lost, you're my guide
We found a way, since hundred days, she was down to ride

Remember it had no AC
We didn't care if they might see
And you chose to stay with me
Who knew that one day we'd be
Remember, it had no AC
We didn't care if they might see
And you chose to stay with me
Who knew that one day we'd be
Remember, it had no AC
Didn't care if they might see
And you chose to stay with me
Who knew that one day we'd be
