

# Dancing in the Fire

Hendersin

Tell me where I should go  
That is when you lost me  
Tell me I can't do it  
I'ma tell you watch me  
You can try your best to  
Save me from disaster  
Tell me I should slow down  
That's when I go faster, yeah  
And you better hold on like a hug  
Pedal, I'ma put it on the floor like a rug  
Advice, you can make it  
But don't you mistake it  
I probably won't take it  
No, no, like a drug  
Don't treat me like a newbie  
Greatest, two-three  
Big boss, Bruce Lee  
I ain't talking QC  
I've been doing this since PK  
No "lee-", I'm doing it the "me" way

You're concerned, I admire  
You're preaching to the choir  
There's lessons that I must learn, yeah  
When the flames get higher  
I'm dancing in the fire  
No, I'm not afraid to get burned, no  
Dancing in the fire  
When the flames get higher  
I'm dancing in the fire  
When the flames get higher  
I'm dancing in the fire

They said I should study hard  
Gotta get the knowledge  
And if I want a good job  
I gotta go to college  
Parents drove me to school  
In the car, I hopped out  
Took about a month or so  
I became a college dropout  
I started reaching for these stars so these people couldn't reach me  
Only lesson learned is these teachers couldn't teach me  
Classes started getting kinda preachy  
Wake me up when it's all over like Avicii  
I appreciate that you really wanna warn me  
But curiosity, it killed the cat, and, you don't wanna mourn me  
Kevin, I am done, I am learning from the pain  
Love the fire, I'm turning up the flame

You're concerned, I admire  
You're preaching to the choir  
There's lessons that I must learn, yeah  
When the flames get higher  
I'm dancing in the fire  
No, I'm not afraid to get burned, no  
Dancing in the fire

When the flames get higher  
I'm dancing in the fire  
When the flames get higher  
I'm dancing in the fire
