Take my hand and feel free
Life will guide us where we need to be

I had to take it off the shelf
Work on mental health
Work on myself
I'm breaking down the glass door

Money and the fame
They gon' know my name
No such thing as pain
Careful what you ask for

I was taught to deal
Forget how you feel
But I keep it on the real
You would think I cast more

Did it with the team
Now I live my dream
20-19
I swear that was my last pour

Yo. The only shot that I'm taking
Is I ain't running out of gas
And I'm not into breaking
Always follow intuition
If not, I'm mistaken
And it's kind of ironic
How I still got 'em shaking

Enough about me, though
Let's talk about you and I
How we got together
Perfect match like a suit and tie

If they hate, let 'em stew
Kind of like the soup you buy
Couldn't put a price on what we have
If you knew a buy

Take my hand and feel free
Promise me that we will keep trying
'Til we're free and feel like we're flying
Life will guide us where we need to be
And I won't let you drown in your sorrow
Rock bottom means a better tomorrow

I heard somewhere that life is crazy
And it's gonna break your heart
I heard there's beauty in the struggle
And I love to make some art
And the things that leave you dumbfounded
In the end will make you smart
We just solve the puzzle pieces
In the end to take apart

Yo. That's how it goes
No "if", "but"s or "maybe"s
Putting in the labor
Yeah. We're working for our babies
Embrace stranger things
Like we're living in the 80s
All hits, no misses
Like we're driving miss daisy
'Cause we ain't ever take the backseat
Perseverance had to train
Like an athlete
They slept on us right away like a stat sheet
When their love is on the rocks
Yeah. We keep it that neat
Isn't that neat?

Take, take, take my hand and feel free
Take, take, take my hand and feel free
