

# Made It

Hendersin

Memories get faded and normal's overrated  
Honestly it's funny how much you know that I hate it  
I just wanna live right now, not regret that we waited  
It's about the journey so don't tell me when we made it, no

Let's just flip the script just like Brad Pitt  
Till living for now is habit  
Searched the galaxy, no tablet  
Get back in, I'm back, we gon' grab it  
Let's just get the things that we wished  
Let's just buck the system, no less  
[?] call won't be missed  
You get the gist

So let's not pretend like this all won't end  
And we won't wish then that it was right now  
So before it does and what is is was  
Well let's take a moment for-or right now

Memories get faded and normal's overrated  
Honestly it's funny how much you know that I hate it  
I just wanna live right now, not regret that we waited  
It's about the journey so don't tell me when we made it, no

Watch that sunrise, watch it set  
Anything's fine with me I bet  
The juice is worth the squeeze at ease  
No Fender, when I'm with you I fret  
Way less, something is afoot  
Pay less, when I'm with you girl  
I weight less, I'm just tryna do more  
And say less, ay yes

They all on that New York Times just putting extras on it  
The life that we want is right in front of us, they taunt it  
But if we want it, we gotta get it if we want it  
If you got it, you got it, you got it, go ahead and flaunt it, mmh

Memories get faded and normal's overrated  
Honestly it's funny how much you know that I hate it  
I just wanna live right now, not regret that we waited  
It's about the journey so don't tell me when we made it

So let's not pretend like this all won't end  
And we won't wish then that it was right now  
So before it does and what is is was  
Well let's take a moment for-or right now
