

Trouble

Hendersin

Ain't tryna have a third life crisis
So I finally got a handle on my vices
And they know they don't ever ask right
And they try to gaslight, but
Have you seen the prices?
'Cause they sky-high, I'm talking to the moon
And flow is so dope, you could put it in a spoon
You could bathe me with compliments until my skin prune
If I blow up tomorrow it'll be too soon
Yeah, I been in it for fourteen
So buy local, buy vocals, it was foreseen
That this would be bigger than I
But I was caught in the middle like [?], yeah
Are you giving a try?
Are you dying to live or just living to die? Yeah
Are you giving a try?
Are you dying to live or just living to die? I mean for real
Yeah

I'm in trouble for letting this take too long
Deciding what's wrong or right for me
I'm in trouble for letting time ever hold on
Making me go on with no time to think
But I don't

I can't wait like the gravity gone
They say you got the best intention but the strategy wrong
I ain't here to point blame, pointing fingers is rude
Hand me down the details, what's the point when it's screwed? Ay
I'm talking like a contractor, try to put me in a box, got a compactor
A role as a king, that LeBron actor
Try to multiply the fear, I got that con factor, for real
That's that division
Tryna make use, making decision
You try to knock me down but He risen
Making sure every single thing that He visioned
Oh, become reality, and I been working since
Amy made [?] and y'all know
I don't ever chase the salary, and when I say
That laws of nature, I ain't talking legalities, nah

You, now you're in trouble, your time has passed
I'm too strong, I'm too excited for you
To come along and blow my bubble, and let my puzzle
Crumble, I've worked too hard on this for you
To change my mind, I hope [?] I look back
Upon these, it won't be just another mistake
I made, I know I'll be prouder to know I tried

So now, nothing can stop me
Yeah now, nothing can stop me
From making it all come true

Whoa-whoa
