

Another Light

Henry Green

I thought I saw smoke run down
And color the sea
There's great difference in the movement now
I'm falling asleep
My head heavy with the ocean sound
But I can't help calling out

For you to cocoon my heart
And put thoughts 'bout you

You pull me out of the dark into another light
And this is the start, just pull me through tonight
You pull me out of the dark into another light
And this is the start, just pull me through tonight

I thought I saw smoke crawl down
Recovered the heat
The sleet trickled from the skin to ground
'Cause I couldn't be any more dissolved than you have me
But I can't help calling out
For you I can lure the dark
You're my counterpart, I need you

You pull me out of the dark into another light
And this is the start just pull me through tonight
You pull me out of the dark into another light
And this is the start just pull me through tonight
