

Loose

Henry Green

Pull me under, let's float down the river
'Cause I still fell you under my skin
When you're in the water it all seems clearer
See where you were straight floating

I shiver through the cold of winter
Watching as the sun stayed without her
Underneath the cold stream flicker
I gave everything for you to let me in

So, don't leave me drifting gently
Between, coordinate me through
'Cause I'm not ready to cut loose from you

All my life I didn't know that
We couldn't hold back the water rushing
I discovered that this isn't so bad
Saw just the impact, the repercussions

I shiver through the cold of winter
Watching as the sun stayed without her
But my eye saw the cold spark flicker
I gave everything for you to let me back in

So, don't leave me drifting gently
Between, coordinate me through
'Cause I'm not ready to cut loose from you

So, don't leave me drifting gently
Between, coordinate me through
'Cause I'm not ready to cut loose from you
