

I'll never know how you feel, couldn't even see it through a telescope  
You're so far when you're near, I'll be circlin' your sphere forever though

Maybe we're star crossed, maybe we're cursed  
All of the science says it won't work  
Maybe it kills me, maybe it hurts  
But it's out of my control, oh, oh

Oh, oh-oh-oh  
My world's spinnin' around you, I never get close  
I can't quite figure out how to  
I'm tryin' but these invisible forces are pullin' me back  
Keepin' me in your orbit  
I wish you'd let go, oh-oh-oh  
But my world keeps spinnin' around you

If I ever broke through, would it be like gettin' too close to the sun?  
Or would it undo my universe and make a better one?

Maybe we're star crossed, maybe we're cursed  
What if it works out? There's always a first  
Maybe it kills me, maybe it hurts  
But it's out of my control, oh-oh

Oh, oh-oh-oh  
My world's spinnin' around you, I never get close  
I can't quite figure out how to  
I'm tryin' but these invisible forces are pullin' me back  
Keepin' me in your orbit  
I wish you'd let go, oh-oh-oh  
But my world keeps spinnin' around you

Couldn't leave if I wanted to  
Stand at the summit, wait for the sun to go down  
Couldn't leave if I wanted to  
Stand at the summit, hopin' you'll come back around  
Couldn't leave if I wanted to  
Stand at the summit, wait for the sun to go down  
Couldn't leave if I wanted to  
Stand at the summit, hopin' you'll come back around

Oh, oh-oh-oh  
My world's spinnin' around you, I never get close  
I can't quite figure out how to  
I'm tryin' but these invisible forces are pullin' me back  
Keepin' me in your orbit  
I wish you'd let go, oh-oh-oh  
But my world keeps spinnin' around you
