

# Heartbreaker

## Her Bright Skies

In the corner of a worn down bar  
picked her out from the start  
cigarettes and cheap perfume  
we're taking this too far  
but she's got class and she's got style  
at least that's what i thought  
how could i think that i'd be the one  
well, i should have known

So put your hands up high  
and reach for the skyline  
got everything i need  
but i want you

Did you see the new boy in town?  
bet you were first in line  
but pretty soon he will understand  
just what you're like  
and don't pretend that you don't know  
exactly what i mean  
he'll read you like an open book  
well, you should have known

So put your hands up high  
and reach for the skyline  
got everything she needs  
but she wants you

So put your hands up high  
and reach for the skyline  
she's got everything  
she's got everything

They see right through you  
and maybe you shouldn't do this anymore

Did you see the new boy in town?  
bet you were first in line  
but pretty soon he will understand  
just what you're like  
so hold your hands up high  
and reach for the skyline  
i've got everything  
i've got everything

So put your hands up high  
and reach for the skyline  
got everything she needs  
but she wants you

So put your hands up high  
just put your hands up  
got everything i need  
but i want you
