

Every Day

Hermitude

Say my name and my heart starts burning
Touch my back and my head starts turning
Treat me nice, I believe it all
Spin me three times, watch me fall

Took me so high up thought I could never come down
See what you like when nobody's around

I think about you every day
Every day, every, every day
When I'm without you every day
Every day, every, every day
I think about you every day
Every day, every day
When I'm without you every day
Every day, every, every day

Hope the nightlife treats you nicely
When you say [?], I shine brightly
I can see it in your face, you're not doing so well
You got all your pieces, left you with a shell

Took me so high up thought I could never come down
See what you like when nobody's around

I think about you every day
Every day, every, every day
When I'm without you every day
Every day, every, every day
I think about you every day
Every day, every day
When I'm without you every day
Every day

I think about you every day
Every day, every day
When I'm without you every day
Every day, every, every day
