

Too Drunk To Drive

hey, nothing

It's a different night in the same old spot
It's like we forget that we hate this block
But there's a party
And everyone including you will be there
You hate the taste of beer so you're takin' shots
I'm two drinks behind you and you haven't stopped
And you're so pretty
I think I might've said that outloud

I don't wanna spend another minute, another second without you
babe
And every time you walk in the room your scent is calling my na
me
You're making me crazy could you be the perfect lady just for t
onight?
And I won't take you home because you know, and I know, we're t
oo drunk to drive
We're too, too drunk to drive

It's a brand new year in the same old crowd
Guess that's what you get when you stick around
And you're so sick of acting like you really wanna be here
You hate the sight of mullets so you close your eyes
The spinning's just beginning and it's on the rise
And you're nauseous
You think you better call it a night

I don't wanna spend another minute, another second without you
babe
And every time you walk in the room your scent is calling my na
me
You're making me crazy could you be the perfect lady just for t
onight?
And I won't take you home 'cause you and I know we're too drunk
to drive
We're too, too drunk to drive

I don't wanna spend another minute, another second without you
babe
And every time you walk in the room your scent is calling my na
me
You're making me crazy could you be the perfect lady just for t
onight
And I won't take you home 'cause you and I know we're too drunk
to drive
We're too, too drunk to drive
