

## Lost in Time

Hi-Rez

Feeling bitchPolar  
My mind's colder than solar systems  
Feeling so imprisoned like a freezer I've been frozen in  
Always find a good girl  
Get bored and turn to hoes again  
Sluts are into older men, its so hard to say no to them  
Holding in emotions that people would never know  
Drowning in this dark depression I wish I could rent a boat  
I wish I could let it go, its like hell is my second home  
Rarely smiled in my life, still people get jealous woah  
People ask what motivates me, and I think they'd hate me  
If they knew I took pills for depression and motivation  
But fuck it I gotta live, and my dark thoughts haunt me  
And anything to get me through the day like drinking coffee  
These rappers forgot their content, they act like its a contest  
To go and grab the mic and just recite a bunch of nonsense  
All my interest been lost, right when swag became a topic  
And rap became an object just to better people's pockets  
But music is taking over my mind, body, and soul  
Alone on this lonely road, that's why I was always stoned  
To run away from my thoughts, I'm praying to every God  
That the devil don't take me and put me in any harm  
I'm on a road with a dead end, can't even trust my best friends  
Or the girl I've been seeing I come home to and have sex with  
I'm going fucking crazy within the house that I rest in  
But still there's a percentage that's telling me that I'm blessed  
But still I've been losing hope, cause they don't know what I go through  
Or how fucking close that I came to tying a rope noose  
If God gave you happiness just be glad that he chose you  
Cause I still ain't found mine and I'm searching like Sudoku  
Life stories and pro tools, people think fame is so cool  
I'm hesitant to blow cause when you do they miss the old you  
I see the future and I feel success is right here  
It started with a dream but it becomes a nightmare  
For Real

Everywhere we go  
Nobody knows  
Where time will take us  
And even though  
We're lost in time  
We keep on moving so we don't get left behind  
Lost in time
