

The Shapeshifter

Hibria

She came out of nowhere
Offering success and light
I was blinded by her intentions
Said her name was "The Virgin"
And her friends were the best
So let me know them, my dear

She will disguise - A wolf in sheep's clothes
In different shapes - Until she steals your soul

Hidden in different names she couldn't find a way
Shapeshifter she became
Lady of darkness came to throw my dreams away
Shapeshifter is her name

I got into her circle - what a pleasure, they said
You will meet us one by one
They would give me the spotlights
I would shine like a star
A glass filled with empty promises

She will disguise - A wolf in sheep's clothes
In different shapes - Until she steals your soul

Hidden in different names she couldn't find a way
Shapeshifter she became
Way of darkness came to throw my dreams away
Shapeshifter is her name
