

POSITIVE INTERVENTION

High Vis

Misery in pursuit of pleasure
No excitement anymore
My only lifeline seemed to be you
It's been three days and still no sleep

I don't want to change the world
Just a positive intervention
All you do is drag me down
I don't want to change the world
Just a positive intervention
All you do is drag me down

Cut the noose, release the tension
Buy me a beer, watch me disappear
I'm weak from the world that surrounds me
I won't look back but your ghost's around me

I don't want to change the world
Just a positive intervention
All you do is drag me down
I don't want to change the world
Just a positive intervention
All you do is drag me down

All you do is drag me down
And all you do is drag me down
All you do is drag me down
