

## Atomic sparks

Highasakite

Be careful with what you say  
We have a beautiful little place  
Don't dismantle it  
Don't lash out  
This is a distraction  
And we're in desperate need of an intervention

We're always wrong anyway  
We're always fucking wrong

Be gentle with your dismay  
We have a thousand lovely moments  
Don't sabotage  
Don't get scared  
This is a reconstruction  
We're in helpless need of a new direction

We're always wrong anyway  
We're always fucking wrong

No this is more than I can take  
Just want to be needed  
No this is more than I can bear  
Just want to be wanted  
But I'm a thousand atomic sparks  
I'm a thousand atomic sparks

Be careful with your ridicule  
We have countless place for memories  
Don't fracture this  
And don't pull back  
This could be monumental  
I'm in desperate need of your whole attention

We're always wrong anyway  
We're always fucking wrong

No this is more than I can take  
Just want to be needed  
No this is more than I can bear  
Just want to be wanted  
But I'm a thousand atomic sparks

No this is more than I can take  
Just want to be needed  
No this is more than I can bear  
Just want to be wanted  
No this is more than I can take  
Just want to be needed  
No this is more than I can bear  
Just want to be wanted  
But I'm a thousand atomic sparks  
I'm a thousand atomic sparks
