

## Far Cry From Freedom

## Highland Glory

So many dangers and threats in this world  
No one can ever feel safe and secure  
Heaven and hell is right here on earth  
There's so much pain man must endure

One life - one shot  
One chance to live out your dreams  
Death comes to knock at your door  
While we're sleepwalking down dead-end streets

As long as our children's not safe in these streets  
Paradise is a dying illusion  
As long as innocent people are killed

Earth is a long way from Eden  
When religion, the power and fortune you gain  
Is worth more than the lives that we made  
More than the sacrificed victims you slain  
We're still a far cry from freedom

Nothing is sacred and never will be  
There are no tears to wash away all our sins  
All the injustice throughout history  
Who can replace all their wasted years

One life - one shot  
One chance to live out your dreams  
Death comes to knock at your door  
While we're sleepwalking down dead-end streets

As long as our children's not safe in these streets  
Paradise is a dying illusion  
As long as innocent people are killed

One life - one shot  
One chance to live out your dreams  
Death comes to knock at your door  
While we're sleepwalking down dead-end streets

As long as our children's not safe in these streets  
Paradise is a dying illusion  
As long as innocent people are killed
