

# Melatonina

## Highly Suspect

Take this pain away  
Hold me, I'm afraid  
I guess you got your way  
When you watched me fall apart  
Rain feels colder in New York  
So, who do you think you are?  
Just another one of my scars

When you're not here  
I learn how to cry  
A bloody lullaby  
But when I'm not here, you'll be alright  
I feel like I could die

Save me if you can  
Hate me like a friend  
If I had my way  
I would watch this whole world fall apart  
Rain shines brighter in the dark  
So, who do you think you are?  
I am naked in a fire

When you're not here, I learn how to cry  
I feel like I could die  
But when I'm not here, you'll be alright  
My bloody lullaby  
When you're not here, I learn how to cry  
Blood stains are in my eyes  
But when I'm not here, you'll be alright  
I feel like I could die

I get ahead of myself sometimes  
We all do  
You loved me and I loved the idea of you  
So, take a number and get in line  
When I was younger, thought I had time  
And now I notice I wasted everything you ever gave me

Walk away and don't stop for anything I say  
Walk away Melatonina  
Walk away and don't turn for anything today  
Walk away Melatonina

Hey  
It's not about you  
Hey  
It's not about you  
Hey  
It's not about you  
Hey

So, feelings come, but they don't go  
I thought I knew, and now I know that I did not know  
You put on your shoes and I'll put on the show  
And I'll sing a bloody lullaby

Take this pain away

Hold me, I'm afraid  
The rain feels colder in New York
