

## Feed This Fire

Highway 101

It might be you, it might be me  
It might be only one degree  
But I would swear it's getting colder in this room  
We just don't seem to care to touch  
We just don't want to share that much  
But darlin' every fire needs something to consume

We've got to feed this fire  
We've got to fan this flame  
If this love burns out we've got ourselves to blame  
We've got to stoke these coals  
Until they glow red hot  
We've got to feed this fire with everything we've got

Have you forgotten about the snow  
How hard that winter wind could blow  
Back when our cold and hungry hearts were on the street  
So let us swear then, you and I  
To never let this fire die  
Until these hearts have turned to ashes in the heat

We've got to feed this fire  
We've got to fan this flame  
If this love burns out we've got ourselves to blame  
We've got to stoke these coals  
Until they glow red hot  
We've got to feed this fire with everything we've got

We've got to feed this fire  
We've got to fan this flame  
If this love burns out we've got ourselves to blame  
We've got to stoke these coals  
Until they glow red hot  
We've got to feed this fire with everything we've got  
We've got to feed this fire with everything we've got
