

The Difference

Hillsong Live

You are the difference in us
You have broken the past
And set us apart
You caused the darkness to end
You lifted our heads
To know You again

Lord You bring us to life
In You our hope will arise

We are found
There's nothing that can hold us down
With anything against us
We know Your love will be the difference
Be the difference
You give and take
Still we will go Your way
All our fear is in the distance
We know Your love will be the difference
Be the difference

You defied reason with love
Took the fall meant for us
You alone are enough
Though we were destined to fail
You opened the way
And broke every chain

Lord You bring us to life
In You our hope will arise

We are found
There's nothing that can hold us down
With anything against us
We know Your love will be the difference
Be the difference
You give and take
Still we will go Your way
All our fear is in the distance
We know Your love will be the difference
Be the difference

You awaken our hearts
To You we owe what we are
You're the change in us
The change in us
We know
You awaken our hearts
To You we owe what we are
You're the change in us
The change in us
We know
You awaken our hearts
To You we owe what we are
You're the change in us
The change in us
We know

We are found
There's nothing that can hold us down
With anything against us
We know Your love will be the difference
Be the difference
You give and take
Still we will go Your way
All our fear is in the distance
We know Your love will be the difference
Be the difference
Be the difference
