

# First Love

Hillsong Young & Free

This is all I want  
That the love I have for You  
Doesn't fade along with youth  
Can You help with that  
The reason that I ask  
I've seen far too many friends  
Walk away and not come back  
I want more than that

I won't wash away  
Like branches in rain  
I'd rather be kindling in the light

Set me on fire like I've never known  
I want to love You more as life goes on  
So all of my days I'll place  
My first love first again

This is all I pray  
Over everything I ask  
That my friends one day come back  
Can You help with that  
God I know You can  
'Cause the fire won't mean a thing  
If it ends right here with me  
You want more than that

The river runs fast  
But You wait at the banks  
And pull us like driftwood from the wild

So set me on fire like I've never known  
I want to love You more as life goes on  
So all of my days I'll place  
My first love first again  
Once I was drifting but You called me home  
So I'll give my life for the ones still lost  
And I'll see my friends reclaim  
Their first love first again

So set me on fire like I've never known  
I want to love You more as life goes on  
And all of my days I'll place  
My first love first again  
Once I was drifting but You called me home  
So I'll give my life for the ones still lost  
And I'll see my friends reclaim  
Their first love first again

You'll see this world return  
And Your first love love You first
