

# Resurrection

HIM

**Hmi**                    **A**  
1. There was a time  
                                 **G**                    **Hmi**  
When I could breath my life in you  
**Hmi**            **A**  
One by one  
                                 **G**                    **Hmi**  
Your pale fingers started to move  
          **Hmi**                                    **A**  
And I touched your face  
                                 **G**                    **Hmi**  
And all life was erased  
                                 **Hmi**                    **A**  
You smiled like an angel  
          **F#mi**                                    **Hmi**  
(falling from grace)

**Hmi**                    **G**                    **D**  
R: We've been slaves to this love  
                                 **F#mi7**                    **Hmi**  
From the moment we touched  
                                 **G**                    **D**  
And keep begging for more  
                                 **F#mi7**                    **Hmi**  
Of this resurrection

2. You kissed my lips  
With those once cold fingertips  
You reached out for me  
And oh how you missed  
You touched my face  
And all life was erased  
You smiled like an angel  
(falling from grace)

R: We've been slaves...
