

Please god let me out
I'm so sick of this lonely town
I'mma take a drive way down south
Where these people never come around
See I stepped into that night
But I went and crossed that line
Now I'm stuck in overdrive
Tryna make up for lost time

See I won't quit, but go ahead
I know there's stuff that you won't say
I'm holding on, but no one's left
I'm used to living in my head
Now I smell the rain up on the ground
That thunder in the clouds
The universe tryna tell me to slow it down
I see the anger in your brows
That pain is gleaming down
I'm never gonna be the one that ever hold you down

Please god let me out
I'm so sick of this lonely town
I'mma take a drive way down south
Where these people never come around
See I stepped into that night
But I went and crossed that line
Now I'm stuck in overdrive
Tryna make up for lost time

I can see it in my breath
I'm finding it hard to take a step
They say I'll never pay my debts
Won't let that anger lead to death
Now I smell the rain up on the ground
That thunder in the clouds
The universe tryna tell me to slow it down
I see the anger in your brows
That pain is gleaming down
I'm never gonna be the one that ever hold you down

Please god let me out
I'm so sick of this lonely town
I'mma take a drive way down south
Where these people never come around
See I stepped into that night
But I went and crossed that line
Now I'm stuck in overdrive
Tryna make up for lost time

Please god let me out
I'm so sick of this lonely town
I'mma take a drive way down south
Where these people never come around
See I stepped into that night
But I went and crossed that line
Now I'm stuck in overdrive
Tryna make up for lost time
