

Wrong Time

Hippie Sabotage

I was in the wrong time, and right place
And I never should have looked into your face
And I always thought that we could maintain
And I never meant to cause you no pain

Why I always got to feel bad, to feel good
Why you always got to talk back, when you shouldn't
I don't got no time for problems, I'm good
And I only want to progress, like you should

There's no going back and forth now, no banging on the door loud
All these 4 a.m. fights got me pourin' out
Tryna rip my soul out, god told me hold out
I'm on the road to pay my rent you said I sold out

Imma stick around until its cold out here
You're either with me or against me, Imma stand out (yeah)
Until death I know you'll miss me at the end of the year
But the truth is just something that you should not fear

I was like right time, right place
And I know I take a look into your face
And all I think is we can maintain
And I never want to cause you no pain

Why I always got to feel bad, when you're good
Why I always got to talk back, when I shouldn't
We ain't got no time for problems, when we should
Man I only want to progress, like we could

There's no going back and forth now, no banging on the door loud
Up at 4 a.m. laughing on the floor now
Tryna get my soul out, but god told me hold out
I'm on the road to pay the rent for our own house

'Cause we gonna stick around until its cold out here
You're either with us or against us, yeah we will stand out (yeah)
Until death I know I'll kiss you at the end of the year
See the truth is just something that I'll never fear

I was like wrong time, wrong place
Can't you see that fucking look in my face
When I always thought that we could go and maintain and make changes
Never meant to ever go that way

But I don't feel bad, I feel good
I don't ever got to talk back, like I should
We don't really got no problems, we good
Man we only got our progress, we good
