

## Understand

Hippo Campus

Driving like a bride in a newly married kind of way  
With the top down and I'm breathing in the sunshine  
Breathing like it's too bright, but I'm alright  
We can go whichever way  
Talk about our long days, take the long way  
You can shoot whatever babe  
If you get the last say, I'll be okay

I don't care what we are, it just has to work  
Where we end is something far  
Something hard to understand

Where's the worry in the wrong thing?  
Gotta find the right scene and I'm getting clean  
Running out of energy playing for the wrong team  
Like a bad dream  
When'd we get so far away from what we wanted, babe?  
Why'd we run away?  
Going on like there's nothing's wrong, tryna find the better days  
'Til they fade away

I don't care what we are, it just has to work  
Where we end is somewhere far  
Something hard to understand

You're onto me, Ada, Ada  
We disagree, made up, made up  
I'll try to get free, gave up, gave up  
Just let me be, Ada, Ada

I don't care what we are, it just has to work  
Where we end is something far  
Something hard to understand  
And we both been on better terms, lesson learned, I'm trying  
Where we end is somewhere far  
Something hard to understand  
I don't care what we are, it just has to work  
Where we end is somewhere far  
Something hard to understand  
I don't care what we are, it just has to work  
Where we end is somewhere far  
Something hard to understand
